US-95 Lakeshore Drive to Sagle Road

The Idaho Transportation Department (ITD) will construct two phases of improvements on US-95 between Lakeshore Drive and Sagle Road to enhance driver safety and mobility through this highly traveled corridor.

PHASE ONE

Phase One construction started at the beginning of October 2021. During construction, two-way traffic will be maintained. Impacts to drivers are expected to be minimal.

US-95 and Lakeshore Drive improvements will include:

- Adding an acceleration lane for traffic turning northbound onto US-95.
- Adding an acceleration lane for traffic turning southbound onto US-95.

PHASE TWO

Phase Two is currently in design. The improvements listed below are subject to change:

- Providing a median U-turn on US-95 as an alternative for drivers wanting to turn left from Lakeshore Drive.
- Adding a traffic signal and aligning the intersection at US-95 and Sagle Road.

Additionally, ITD is considering the following two improvements for Bottle Bay Road:

- Providing an acceleration lane for traffic turning northbound onto US-95 from Bottle Bay Road.
- Providing a deceleration lane for northbound traffic turning onto Bottle Bay Road from US-95.
