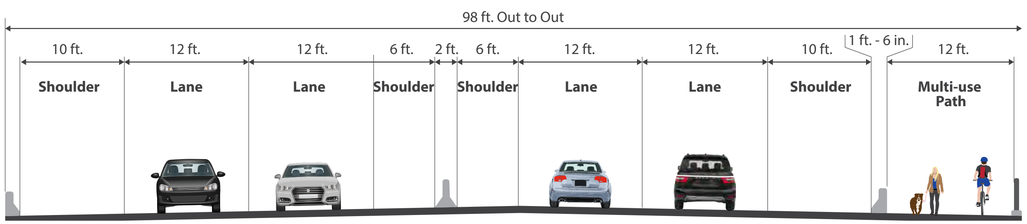
US-95 LONG BRIDGE

US-95
Sagle Road to
Lakeshore Drive

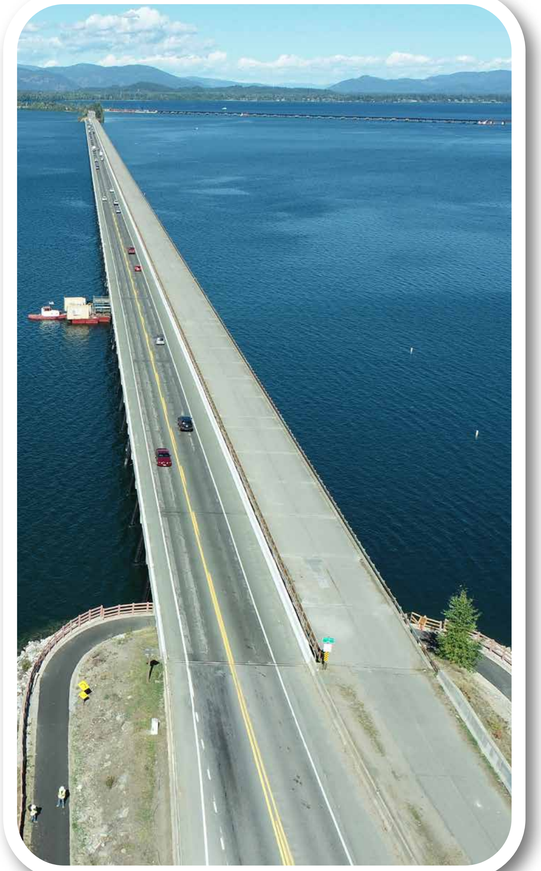
Vehicular bridge:

- Built in 1981
- Repairs were completed in 2021
  - **Expansion joints replaced**
  - **Piers wrapped with protective coating**
- Several more repairs identified to get the structure to 100-year service life



Pedestrian bridge:

- Built in 1956, this bridge first served cars crossing the lake
- Once a new bridge was built next to this one in 1981, the older bridge was designated for bicyclists and pedestrians
- Final repairs were completed in 2021 and are expected to get the structure to 100-year service life
  - **Joints replaced to be easier to walk or ride over**
  - **Surface repairs**



- Both bridges could one day be replaced with one wider structure for an estimated $140 million (in 2019).
